SUMMARY

Software Engineering student at the University of Jeddah (4.65/5.00 GPA) and co-author of an accepted IEEE/ACM ASE 2026 research paper. Experienced in web, mobile, and backend development through hands-on projects, including leading the AI team for the RepoCare senior project. Seeking a full-semester Co-op opportunity starting January 2027 to apply core engineering principles in building practical, scalable solutions.

EDUCATION

University of Jeddah — Saudi Arabia
Bachelor of Software Engineering — GPA: **4.65/5.00**
Expected Graduation: **June 2027**
Academic Excellence Recognition for each of the four completed academic years

RESEARCH

VidSumEval: A Web Platform and Benchmark for Evaluating AI-Generated Programming Video Summaries
Co-author — IEEE/ACM ASE 2026 — Accepted 2026
DOI: 10.1145/3832783.3834594

- Co-developed a web platform and reusable benchmark for evaluating AI-generated programming tutorial summaries based on learning effectiveness and summary quality.
- Focused on software tooling and benchmark workflows supporting 10 tutorials, 20 AI-generated summaries, 50 quiz items, and 20 study participants, using Node.js, Express.js, SQLite, HTML, CSS, and JavaScript.

PROJECTS

RepoCare – Graduation Project — AI Team Lead — 2026–Present

- Lead the AI team for a smart healthcare platform integrating medical reports, health sensor data, and an AI assistant.
- Designed a hybrid RAG approach separating deterministic retrieval of user health data from semantic retrieval of curated medical knowledge using embeddings and vector search.
- Develop AI components for RAG and LLM integration using Gemini embeddings, Firestore Vector Search, LLM APIs, and Anthropic Claude, while coordinating AI integration decisions across the project.

QnuniApp – Android Legal Case Management Application

- Developed features for an Android application using Java, XML, and Firebase for legal case management and lawyer-client communication.
- Designed and implemented the real-time chat module using Cloud Firestore and Firebase Storage, supporting text messaging, file sharing, conversation history, and case-status updates.

Smart Outing Planner – Web Application

- Designed the application UI/UX using Figma and Sketch and implemented the responsive frontend using HTML, CSS, and JavaScript.
- Built multi-page flows for plan generation, activity refinement, saved plans, authentication, and Arabic/English support with backend API integration.

Additional Academic Projects

BizCo System – Software Architecture: Analyzed architecturally significant requirements and quality attributes, and designed a message-queuing architecture considering reliability, availability, security, and performance.

Municipal Councils E-Voting System – Requirements Engineering: Developed stakeholder and use-case models, functional and non-functional requirements, business rules, and a requirements traceability matrix.

TECHNICAL SKILLS

Languages: Java, JavaScript, Python, SQL, XML
Backend & Databases: Spring Boot, Node.js, Express.js, REST APIs, Firestore, Firebase Realtime DB, SQLite
Architecture & Design: Software Architecture, System Design, OOP, Design Patterns
Web & Mobile Development: HTML5, CSS3, Android SDK, Responsive Web Design
AI & Generative AI: RAG, LLM APIs, Prompt Engineering, Embeddings, Vector Search
Tools & Practices: Git, GitHub, Maven, Gradle, JUnit, Agile/Scrum

AWARDS & CERTIFICATIONS

1st Place – Three-Minute Project (3MP) Competition — University of Jeddah — 2026
Academic Excellence Recognition — University of Jeddah — Recognized in each of the four completed academic years
Agile Foundations — LinkedIn Learning — Oct 2025

LANGUAGES

Arabic: Native **English:** Upper-Intermediate
